

## imio-PAK

Suitable for manual, semi and fully automated systems

Do you struggle with the productivity in your packing function? Is training staff for peak periods not proving cost effective? Are you looking for more flexibility from your existing WMS?

imio-PAK delivers better performance and control of your order fulfilment processes by driving flexible and simple label and packslip design and print processes:

### Features include:

- Automation **compatible**
- **Modern** / simple user interface
- Seamless host system **integration**
- **Efficient** logging functionality
- **Client Access** Licences (supervisor & operator)
- Suitable for both **manual and automated warehouses**
- **Scan-first** methodology

imio-PAK is a scalable solution that will reduce your overall cost per order. By simplifying desktop printing, this smart software solution will enable automated packing integration, create a user friendly desktop interface, allow design of pack slips and carrier labels, manage printer interfaces, and provides logging and reporting functionality.

### Benefits:

- Treble order **productivity levels**
- Generate **ROI within 12 months**
- **Improve the traceability** of your operations, from audit trails to staff assessments
- **Reduce errors** and staff training times
- **Create a streamlined packing process**, improving throughput rates
- Deliver an **efficient process** for managing bulk orders during peak
